

## **Health and Safety Responsibilities Haven UK**

We have an agreement with Haven UK to provide us with the following services:

- to develop our health and safety policy, including the organisation, responsibilities, monitoring and checking.
- to carry out specified risk assessments and provide us with training so that we can carry out risk assessments independently on an ongoing basis. This forms the basis of our risk management programme and helps us plan our future actions to reduce risk.
- provide a telephone help line.

Additionally and as required:

- to support us in accident investigations
- provide training as required.

Haven UK fulfils the role of 'Competent Person', providing advice and assistance on Health and Safety issues in accordance with Regulation 7 of the Management of Health and Safety at Work Regulations.

For Haven UK to provide us with effective support, we must in turn provide Haven UK with all the information that is necessary concerning our operations.

We also recognise that Haven UK are acting in an advisory capacity and their involvement does not in any way diminish our responsibilities under the law.

END
